

## David Attenborough – Volcanoes Comprehension Questions

1. Where is the volcano Kilauea?
2. What is magma, and how long has it been flowing?
3. David said that the magma has burst out of something, what has it burst out of?
4. Name 3 things that wouldn't exist without volcanoes.
5. When David is talking about the corrosive body of water, he says that the water carries "such a *concentration* of chemicals, that it can burn skin." What does he mean by 'concentration'?
6. Would you swim in this lake? Why / why not?
7. David says that "intense evaporation has created islands of salt." What does he mean by 'intense'?
8. Would this lake be a good place for humans to have children? Why / why not?

Summarise, in 2 or 3 short paragraphs, the main points that David made in the clip we watched.
